EIRA

Designed by Alegre Design

Task chair created for every workspace.

Task chairs

Executive chairs

Key features of EIRA:

- An economically sound choice for large-scale projects.
- Minimalist design – the carefully refined shapes of both the backrest and the seat ensure visual harmony and lightness.
- Ergonomic backrest – naturally adapts to the user, providing continuous support and promoting a healthier sitting posture.
- Weight-sensitive synchronous mechanism – the chair automatically adjusts to the user, ensuring comfortable sitting without additional manual adjustments.
- Wide choice of functions – fixed or depth-adjustable seat, 2D or 3D adjustable armrests, lumbar support, headrest and a coat hanger.
- Variety of fabrics and colours – suitable for different combinations and interior concepts.
- Castors for various floor types – suitable for both soft and hard surfaces.
- Easily adaptable – ideal for open-plan offices, collaborative spaces, and executive workspaces.

Sustainable producer credentials:

- 100% renewable electricity used in production.
- Comprehensive annual sustainability report.

ISO 14001 ISO 45001 ISO 9001

Potential sustainable building contributions:

- These attributes can help you achieve criteria towards LEED, BREEAM, SKA, and WELL building certifications.

Product quality:

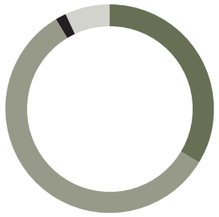

- 5-year warranty.
- Complies with the European ergonomics and safety standard: EN 1335-1:2020+A1:2022.

Sustainability information

The EIRA task chair is available in various configurations, but this document presents a reference model: an EIRA task chair with a weight-sensitive synchronous mechanism (5 locking positions), 3D adjustable armrests, height-adjustable lumbar support, fixed-depth seat, castors for soft floors, and TALE mesh (FT02) with Step / Step Melange upholstery (GL12).

Product material breakdown:

- Plastic (57.81%).
- Metal (33.84%).
- PU foam (6.84%).
- Upholstery (1.72%).

High quality, certified materials:

- Upholstery collections certified according to Oeko-Tex Standard 100 and EU Ecolabel.
- Mesh fabric TALE certified according to Oeko-Tex Standard 100 and EU Ecolabel.
- No SVHC (Substances of very high concern) present in the product.

Product circularity:

- Designed for disassembly: 74% of parts are separable.
- Spare parts available to order.
- Recycled content in the product: 43%.

- Product recyclability: 62%.

Delivery and packaging:

- Delivery type: land and sea.
- Optimised packaging: all product parts in a single package.
- Packaging materials: 100% recycled cardboard and plastic bags.
